KRONOSwiss[®]
FLOOR SOLUTIONS

NATURE IS OUR SECRET

FSC-certified timber from Swiss forests not only stands for outstanding quality, but also for sustainability and the responsible use of the natural raw material. After all, our floors must live up to the highest standards – on all levels.

PASSION FOR WOOD

Our highly modern production facilities allow maximum precision and uncompromising quality. But innovative machinery alone is not enough: committed employees with many years of experience accompany the working process that has developed according to the latest technology and thereby ensure that floors are created which never cease to impress.

DESIGN THAT INSPIRES

We are convinced that good interior decoration starts from the “floor” up. It is the foundation of every room and reflects the character of its inhabitants or its users. We are therefore always looking for innovative design and the latest trends.

TRADITION MADE IN SWITZERLAND

Modern home décor has always played a very big role in Switzerland. And that’s no wonder: beautiful things are also created in a beautiful environment. With floors of superior quality from Kronoswiss, you can have your very own piece of Switzerland at home. And as a result, you will also get to enjoy Swiss precision, reliability, sustainability and innovation.

KRONOSWISS AQUASTOP

NATURAL RESSOURCES

NATURAL RESOURCES

Produced to strict European standards. For healthy living, emissions are the same as you would expect from wood in its natural state. KRONOSWISS AQUASTOP laminate is made of 100% natural materials, mainly wood.

CHILD & PET FRIENDLY

CHILD & PET FRIENDLY

KRONOSWISS AQUASTOP is a natural product, which according to a recent survey by the prestigious Fraunhofer Institute poses no risk to health. This makes it particularly suitable for young children and pets, who spend a lot of time in contact with the floor. In addition its superior abrasion (cl. AC 5/33, scratch and impact resistance performance make KRONOSWISS AQUASTOP a highly resilient floor.

WET MOPPABLE

WET MOPPABLE

KRONOSWISS AQUASTOP can be cleaned with a wet mop. We recommend the usage of a vacuum cleaner or a dust mop for regular cleaning. If necessary, the floor may be cleaned with a wet mop. Avoid using too much water. Do not pour liquid directly on the floor or use an excessively wet mop that will leave puddle of water standing on the floor.

THE 48H / 72H PROTECTION AGAINST EVERYDAY HOUSEHOLD SPILLS AND PET ACCIDENTS

KronoSwiss Aquastop is engineered to withstand topical moisture such as everyday household spills for at least 48 / 72 hours. Still, if detected, promptly remove all liquid spills, including pet urine and never flood the floor with water. As all wood based products, even KronoSwiss Aquastop with its increased resistance, will react to the moisture in the environment and as a result will expand or contract accordingly. Although it has been designed for improved performance against water/moisture it is not waterproof and excessive wetting is to be avoided.

TECHNICAL SPECIFICATIONS

CHARACTERISTICS

Attractive

Available in authentic Oaks in modern colour tones from light to dark and individual, distinguished planks. A floor of timeless beauty to enrich any place.

Innovative

Looks and feels like a precious hardwood floor – unrivalled in depth and precision of how the structure meets perfectly with the decor. Produced with the latest technology.

Healthy

Produced to strict European standards. For a healthy living, emissions of vapours are the same as you would expect from wood in its natural state.

Ecological

Produced at the most modern, environmental friendly production facility of its kind.

Resilient

Superior abrasion, scratch & impact resistance as well as colourfast (anti-fade) & anti-static properties.

Affordable

Unbeatable Price vs Performance ratio compared to traditional hard wood floors. Great value for money with long-term cost savings making it the ideal choice for your flooring solution. It's a low maintenance and easy to care flooring, there is no need to wax or polish and it will stay looking like the day you installed it for many years to come.

TECHNICAL CLASSIFICATION

Laminate floor covering according to EN 13329 and EN 14041 High Density Fibreboard (HDF) E1 DoP KCH_LFa_002
